

Professional Summary

Experienced forward-thinking Data Scientist with a passion for innovation and a curious mindset. Known for developing end-to-end data processing pipelines to increase workflow efficiency and leveraging modern machine learning and AI solutions to deliver data backed insights. Blend critical thinking and analytic skills with strategic vision, fostering cross-functional teams to deliver impactful insights. Committed to providing companies with actionable insights that drive company growth. Highly motivated to use my diverse background and analytic skills to innovate workplace strategies.

Skills

• Python	• PyTorch	• Pandas	• GitHub	• Collaboration
• R	• scikit-learn	• NumPy	• DagsHub	• MLOps
• SQL	• XGBoost	• Power BI	• Apache Airflow	• English (Native)
• VS Code	• Matplotlib	• A/B Testing	• Docker	• German (B2)

Work Experience

Data Scientist

Berliner Institut für Innovationsforschung | 04.2025 - present
Responsible for data ingestion, ensuring data quality, and analyzing consumer sentiment. | [Link](#)

- Built an end-to-end system for global sentiment tracking, combining browser automation, public APIs (e.g., Reddit, Google), and transformer-based summarization, to public perceptions of the insurance sector. Increased data ingestion and quality by 150%.
- Collected and analyzed over 500,000 multilingual data points from global data, identifying pain points to inform the launch of new product offerings and service innovations.
- Developed a Retrieval-Augmented Generation (RAG) pipeline leveraging large language models (LLMs) and FAISS to extract and synthesize key insights, pinpointing customer pain points and value drivers in the insurance sector and enabling data-driven strategic decision-making.

Data Scientist

Ludwig-Maximilians-Universität München | 03.2023 - 08.2024
Responsible for A/B testing design, data ingestion and quality assurance, and data analysis.

- Built and validated a multilingual speech data platform for BAS, boosting data accessibility and cutting retrieval time by 30%.
- Co-developed and streamlined pipelines, including speech annotation, raising productivity by 15%.
- Built predictive models to support data-driven decision-making and uncover key business insights.

Project Manager

Leibniz-Zentrum Allgemeine Sprachwissenschaft | 09.2021 - 03.2023
Responsible for A/B testing design, data ingestion and quality assurance, data analysis, and managing project workflows and timelines.

- Engineered data pipelines and conducted statistical analysis, boosting efficiency by 30%.
- Automated speech segmentation tasks, increasing efficiency by 30%.
- Secured €160K+ in project financing, increasing project capacity by 100% and company visibility by 20%.
- Published 2 articles in leading industry publications, increasing reader engagement 5% and driving future research directions.

Data Scientist

University of Victoria | 09.2020 - 08.2021

Responsible for A/B testing design, data ingestion and quality assurance, workshop facilitating, and training clients.

- Secured C\$90K in project financing, increasing project capacity by 125%.
- Applied advanced analytics techniques, including PCA, k-means clustering, and random forest models, to generate actionable insights driving business decisions.
- Facilitated 5 workshops that improved client learning outcomes by 25%.

Projects

Rakuten Classification Challenge | [Link](#)

- Built a multimodal classifier using NLP models and computer vision models, improving F1-score to 0.883 and boosting classification accuracy by 10%.
- Enhanced image processing by 12%, improving model feature extraction.
- Developed a robust text pipeline (cleaning, decoding, formatting), improving model performance by 10%.
- Tested and compared multiple ML/deep learning models.

Brain Tumor Detection | [Link](#)

- Achieved weighted F1-score of 0.903 using DenseNet169, outperforming most radiologists.
- Evaluated models using torchcam, ROC-AUC, and F1.
- Built training pipeline (image transforms, model training, evaluation).
- Designed and trained custom model deep learning model (F1: 0.828).

Education

PhD Linguistics <i>University of Toronto</i>	Masters Linguistics <i>University of Toronto</i>	Bachelors Linguistics <i>University of British Columbia</i>
--	--	---

Certificates

Data Science & MLOps

Université de Paris, Sorbonne | 09.2024 - 03.2025

- Specialized in deep learning models, statistics, scaling solutions, APIs, automation and data integrity, and code versioning (GitHub, DagsHub).
- Gained knowledge and practical experience building and deploying machine learning models.
